

USER REFERENCES: **SENTINEL™ FLOATING BRUSH SEAL**

The below users have given their permission to be a reference for the Inpro/Seal® Sentinel Floating Brush Seal (FBS) product and can be contacted by new prospects.

Each reference has had several years of experience with the Sentinel FBS particularly with Elliott YR machines. Since the adoption of the floating brush, users have experienced longer maintenance intervals between seal change-outs. In many cases, the first installs with these customers were with “problem child” units where the need for an improved sealing solution was a “must have”. The below end users have adopted the technology and have observed successful seal performance to 3 years of operation.

Mike Long – Reliability Engineer
Dakota Gasification Company – Beulah, ND
Tel: (701) 873 – 6752

Patrick Yackel – Maintenance Superintendent
Valero – Texas City, TX
Tel: (409) 948 - 7461
